Working Group Reports

Cataloging Working Group

The Cataloging Working Group met for the last time on September 8, 2017. Its recommendations are included in the Consortia Committee's October meeting packet.

Consortial Model Working Group

The Consortial Model Working Group met for the final time on August 7, 2017. Its recommendations are included in the Consortia Committee's October meeting packet.

Overlay Working Groups

The Overlay Software Search Working Group concluded its work with its recommendation to begin contract negotiations with Auto-Graphics for its SHAREit software.

The Overlay Project Working Group has not met since August 31, 2016, as the focus has been on the software search process. It will be revamped with new membership that includes representatives from the consortia participating in the pilot project. This working group will serve as a steering committee to assist with decisions that will need to be made during implementation.
