

RAILS Universal Service Plan

August 2024 (Amended)

Introduction

The <u>Illinois Library System Act (75 ILCS 10/3)</u> establishes rules and regulations for library systems to guide their delivery of services including to "provide library service for every citizen in the state by extending library facilities to areas not now served." In addition, the Illinois Compiled Statutes (75 ILCS 16/30-55.60) include laws related to the use of a public library by nonresidents.

Recognizing the importance of this legislation, and to help achieve our strategic plan RAILS 2022-2025 Strategic Plan objective to

"Collaborate with the Illinois State Library, the Illinois Heartland Library System, and other partners to develop a plan and timeline for achieving universal service" expand access to library resources and services by addressing issues related to unserved and underserved Illinois residents and continuing to work toward a statewide library card," RAILS created and updated this Universal Service Plan.

The goals in this plan were developed in collaboration with the <u>2024 RAILS Universal Service Committee</u> and in response to widespread feedback from RAILS member libraries, including responses to an August 2019 survey designed to uncover the challenges libraries face related to the unserved. RAILS received 238 responses to that survey from a possible total of 412 responses, for a response rate of 58%.

This plan includes three major goals, with a number of specific actions for each goal. <u>This plan is</u> intended to serve as an update and extension to the goals created and established in 2020

Goal 1: Gain an understanding of exactly who is unserved in Illinois and why

Rationale:

Approximately 950,000-975,000 of an estimated 12.7 million Illinois residents are untaxed for public library services; in RAILS, the number is approximately 700,000. This represents about 8.8% of the state's population. While we can identify specific regions of the state that do not currently receive public library service, we do not know as much about the specific characteristics of people who live in those areas. For example, how many are adults? How many are children? What is their education and income level? Do they have internet access at home? The more we can find out about the unserved and

their needs, the better equipped we will be to demonstrate how public library service can help meet those needs and improve the overall quality of their lives.

Action 1:

Analyze data from the Illinois Department of Revenue/Illinois State Library (ISL) Library Service Areas map and the U.S. Census Bureau's map data to get a clear picture of the different demographic characteristics of unserved areas and develop a complete demographic profile of unserved areas in Illinois. Gain an understanding of exactly who is unserved in Illinois and why.

Update:

The Illinois State Library worked with Southern Illinois University Edwardsville and GeoMARC (Geospatial Mapping, Applications, and Research Center) to create a map of Illinois service areas (including visual representations of the unserved) using United States Census data. These maps can be viewed at:

https://siuegeography.maps.arcgis.com/apps/webappviewer/index.html?id=0896ea81f7274518bc5299b291770e7d

RAILS has recently acquired ArcGIS software and are investigating additional mapping layers that could be added to the RAILS service area maps, including overlap between school districts and unserved areas.

Committee asks if RAILS could use geomapping to create a list of addresses that libraries could use to send mailers that could be mailed to residents from the closest library? Are there grant funds that could support this?

Action 2:

Further define what universal service, the unserved, and nonresidents mean in the face of access to the database package from the SoS and Illinois State Library.

Goal 2:

Simplify nonresident card laws and rules to eliminate confusion and to extend service to unserved residents through innovative projects and law and regulation changes

Rationale:

Responses to the August 2019 RAILS survey and other feedback gathered from RAILS members indicates that there is great confusion about Illinois law related to the unserved and how to interpret this law. Libraries are currently following a wide variety of different practices. Some of these would be considered "legal," others may not be. There have also been changes to the law in recent years, and many libraries are not aware of these changes. RAILS libraries are already engaged in a number of innovative practices to serve the unserved. Finding ways to share these innovative practices with other libraries and to expand current laws related to the unserved to incorporate these practices would increase and improve services to the unserved statewide.

Action 3: Work with the RAILS Universal Services Committee and ISL to legalize some of the many

current practices that provide temporary teacher or seasonal library cards to the

unserved.

Update: Efforts were shifted to Cards for Kids and Cards for Kids expansion once that effort got

underway in 2020.

Action 4: Work with the Universal Services Committee and ISL to expand the definition of

reciprocal borrowing so a public school card could be used to check out materials at a

public library.

Update: Efforts were shifted to Cards for Kids and Cards for Kids expansion once that effort got

underway in 2020.

Action 5: Continue to provide and expand RAILS website information about forming

intergovernmental agreements (IGAs) to provide service to the unserved, including templates, frequently asked questions, IGA examples from other libraries, and other information. Publicize the availability of this information to all Illinois libraries on a regular basis and continue to consult with RAILS members interested in forming an IGA

and investigate the possibility of providing basic legal assistance.

Update: Information is available and continues to be updated at the RAILS page focusing on

Intergovernmental Agreements for Public Service. Committee is interested in continuing

to further this goal.

Action 6: Continue to work with ILA's Public Policy Committee to enact an amendment to the

Public Library District Act designed to remove barriers to libraries merging.

Update: There was an active discussion with PPC on this issue in 2020/2021 but there was

enough resistance from Illinois libraries that this specific legislation did not move forward. There is interest from the committee in continuing to explore this issue.

Action 7: Provide more information, CE opportunities, and/or basic legal assistance on how to

annex unserved areas.

Update: We are regularly providing consulting to member libraries interested in converting from

a municipal to a district library, enabling annexation opportunities for contiguous

unserved areas.

Action 8: Work with community colleges to help them expand and extend library services to the

unserved.

Update: This was a Board Development topic at RAILS Board Meetings, and there were

discussions with NILRC on avenues for support. Some Community College libraries do extend services to community members, but this is not Universal. There were continued discussions with the Illinois State Library about Community College boundaries and

whether that model could support Universal Service.

Action 9:

Continue to work with Illinois real estate associations to require disclosure on whether or not public library service is included for residential real estate. Contact bar associations to see if they can assist with this effort.

Update:

Continued discussions on this issue resulted in letters of support from the Illinois State Library, IHLS, and the Illinois Library Association in favor of including library service in real estate listings. These were sent to MRED and discussed in Fall 2021. In Spring 2022 a compliance analyst at Midwest Real Estate Data acknowledged that the letters had been reviewed and shared that there were no plans to add an additional library field. This may be an issue to revisit.

Action 10:

Simplify nonresident card laws and rules to eliminate confusion and to extend service to unserved residents through innovative projects and regulation changes

Goal 3: Demonstrate the economic and societal value of extending library service to the unserved

Rationale:

Approximately 69,000 of the estimated 950,000 - 975,000 residents that are currently not taxed for library service in Illinois choose to purchase a public library card. It is unclear how many of the remaining number are aware of just how public library service can benefit them. In addition, most of the respondents to RAILS survey only publicize library services available to nonresidents via the library website and promotional materials available in the library. If libraries do not use outreach strategies to promote library service directly to the unserved, these individuals will never know what they are missing.

Action 11:

Continue to work with ISL, IHLS, and ILA on efforts to issue a statewide library card and to lead efforts to achieve universal library service in Illinois.

Update:

As part of their Statewide Database program, the Illinois State Library has sought an expansion to the public library rules allowing nonresidents to use eResources. It is expected that this change in the administrative rules will allow nonresidents to use the statewide databases. There has been mention by the Illinois State Library that they may enlist the systems to assist in this process, but we don't have details to share yet.

The RAILS Board also issued this statement on <u>Universal Library Service</u> in October 2021. Committee is also interested in pursuing options for System or LLSAP based cards.

Action 12: Develop strategies and talking points for promoting the value of universal library service to legislators.

- Action 13: Develop talking points for library staff to use when talking to legislators about issues related to the unserved, focusing on numbers and how the lack of library service affects the constituents in their specific legislative district.
- Action 14: Through RAILS' My Library Is... campaign, provide suggestions on how libraries can effectively reach out to unserved populations, including providing information on the value of library programs/services, how residents are taxed for library service on their tax bills, and what they get for this small investment.
- Action 15: Promote the value of extending library services to the unserved and encourage libraries to undertake public awareness campaign efforts promoting nonresident services. Provide templates for publicity materials to help with these efforts.
- Action 16: Promote the value of extending library service to the unserved and encourage libraries to undertake public awareness campaigns promoting nonresident services. Provide templates for publicity materials to aid with these efforts.
- Action 17: Support access to the statewide database program, especially for the otherwise unserved.
- Action 18: Continue support for broadband for libraries through the BEAD and digital equity act
