RE: Accessibility Evaluation for LOTE Online for Kids

LOTE Online for Kids has a built-in web accessibility tool that allows users to increase the size of text, change the website display to grayscale, and modify the website for high contrast colours. The website is tested and evaluated against WCAG guidelines after major releases, and at least annually, to ensure the platform remains highly accessible for users. Here is a snapshot from the online WAVE Accessibility tool.

The platform also has a language accessibility toggle to help users from non-English speaking backgrounds.

Please reach out if you need further information, or an updated list of Illinois Libraries.

Kind regards,
